GitHub: https://github.com/SaiHimaSindhu/

PROFESSIONAL SUMMARY:

Computer Science graduate with knowledge of Python, Django, Flask, SQL, web development, and machine learning. Experienced in developing academic projects and completed a virtual internship with Infosys Springboard. Strong problem-solving skills, understanding of database management, and eagerness to learn new technologies and contribute to software development projects.

TECHNICAL SKILLS:

Languages: Python, SQL
Web Technologies : HTML, CSS, JavaScript (Basics)
Framework & Libraries: Flask, Django, NumPy, Pandas, Matplotlib
Tools: Git Version Control, GitHub, VS Code, Jupyter Notebook
Database: MySQL, SQLite
Concepts: OOP, CRUD Operations, REST APIs, SDLC

INTERNSHIP:

Infosys Springboard – Virtual Internship
Project: Smart Air Quality Prediction System September 2025 – November 2025

- Developed a machine learning-based Smart Air Quality Prediction System using Python by preprocessing air quality datasets and building predictive models.
- Collaborated with team members to evaluate model performance, test prediction results, and improve system accuracy through data analysis and problem-solving techniques.
- Gained hands-on experience in Python programming, data preprocessing, machine learning concepts, and project development.

PROJECTS:

Personal Expense Tracker
Python, Flask, SQLite, HTML, CSS

- Developed a web-based expense management application using Python, Flask, and SQLite to record, track, and organize daily expenses efficiently.
- Implemented CRUD operations with a responsive user interface, enabling users to add, update, delete, and view expense records seamlessly.

Student Management System:
Python, MySQL, Django, HTML, CSS

- Developed a web-based Student Management System using Python, Django, HTML, CSS, and MySQL to manage student records with Create, Read, Update, and Delete (CRUD) operations.
- Implemented user authentication (Login/Logout) and an interactive dashboard for secure student data management and efficient record tracking.

Fake Social Media Profile Detection Using Machine Learning
Python, Pandas, NumPy, Matplotlib, Scikit-learn

- Built a machine learning model to classify genuine and fake social media profiles using Logistic Regression.
- Performed data preprocessing, exploratory analysis, and model evaluation, with visualizations created using Matplotlib and Seaborn.

EDUCATION:

B.Tech - Computer Science and Engineering (2021-2025)
International School of Technology and Sciences for women, Rajanagaram

CERTIFICATIONS:

- **Introduction to HTML** - Sololearn
- **Basics of Python** - Infosys Wingspan
- **SQL Bootcamp** - Udemy
- **AI Tools & ChatGPT Workshop - BE10X**
